Earth and Planetary Science Letters 163 (1998) 415–421

EPSL

Subject Index Volumes 154–163

absolute age, (158) 67, (158) 175, (160) 637, (160) 795, (161) 19, (161) 215
accelerator mass spectrometry, (161) 231
accreting plate boundary, (160) 463
acidic composition, (160) 433
acoustical surveys, (154) 167
active tectonics, (159) 35
Adams County Ohio, (162) 177
advection, (154) 295
Aegean Sea, (157) 23
Akwatia, (159) 1
Al-26, (154) 93, (161) 231
Aleutian Islands, (158) 53
Algeria, (160) 651, (160) 667
alkali basalts, (162) 45
Alps, (159) 35
alteration, (162) 165
alternating field demagnetization, (160) 257
aluminum, (158) 91
Amadeus Basin, (162) 97
anaerobic environment, (158) 165
anatexis, (158) 19, (160) 609
Anatolia, (157) 105
Andes, (154) 153
andesite, (154) 153, (159) 133
andesites, (160) 479
anelasticity, (157) 193
Angola, (160) 147
anhydrite, (155) 167, (156) 125
anisotropy, (157) 141
anorthite, (158) 91, (162) 27
Antarctica, (155) 131, (160) 179
Apennines, (154) 25
Ar-40/Ar-39, (155) 221, (156) 75, (158) 67, (160) 637, (163) 53
Arabian Sea, (154) 41
Archean, (155) 57, (158) 109
Arctic Ocean, (162) 81
Arctic region, (160) 587
Argentina, (155) 1
Argentine Basin, (161) 73
ash-flow tuff, (156) 225
Asia, (156) 47
assimilation, (162) 123
Assimilation, (154) 153
asthenosphere, (156) 253, (157) 193, (160) 1, (161) 45
Atlantic Ocean, (155) 15, (161) 161
atmosphere, (154) 247, (158) 157, (160) 695
attenuation, (162) 1
authigenesis, (163) 221
Azores, (160) 637

back-arc basins, (154) 127, (157) 23, (160) 297
bacteria, (163) 247
Balearic Islands, (160) 651, (160) 667
Bandelier Tuff, (160) 209
basaltic composition, (160) 433
basalts, (154) 127, (154) 331, (160) 297, (160) 845, (162) 63, (162) 137, (162) 165, (163) 1
basins, (154) 73, (163) 275
bathymetry, (161) 73, (161) 243, (162) 81
Be-10, (154) 93, (160) 723, (161) 231, (163) 197
Betic Cordillera, (160) 225
Betic Zone, (163) 69
biochemistry, (156) 267
biogenic structures, (163) 191
biogeochemical methods, (157) 223
biomass, (157) 223
biostratigraphy, (163) 69
black shale, (158) 165
black smokers, (160) 419, (160) 521
bones, (160) 587
Bouguer anomalies, (156) 253, (161) 243
Bouguer gravity, (159) 117
breccia, (160) 353
Brunhes–Matuyama boundary, (159) 147
burial, (160) 695
Bushveld Complex, (155) 149

C-13/C-12, (155) 237
C-14, (160) 795
cadmium, (160) 403
calc-alkalic composition, (158) 53
calcite, (160) 273, (161) 189

calcium-aluminum inclusions, (158) 91
Campanian, (156) 209
Canary Islands, (163) 343
carbon, (154) 127, (155) 197, (160) 81, (160) 97, (160) 695
carbonates, (160) 811
carbonatites, (158) 131
Caribbean region, (155) 221
Cascadia subduction zone, (156) 173
cataclasis, (163) 83
caves, (156) 141
Celebes, (163) 381
Cenomanian, (158) 165
Central Gneiss Belt, (157) 89
Central Indian Ridge, (163) 207
ceramic materials, (160) 257
cerium, (163) 207
CFD, (156) 195
chalk, (156) 209
Chatham Rise, (163) 247
chemical digestion, (159) 71
chemical fractionation, (155) 183
Chesapeake Bay, (160) 353
Chile Ridge, (160) 447
China, (161) 101, (161) 135
chlorine, (161) 33
chondrules, (155) 183
chromite ores, (156) 185
climate, (160) 623, (160) 695
clinoptilolite, (160) 369
clinopyroxene, (158) 39, (160) 493
color, (157) 233
Columbia River Basalt Group, (154) 1
comets, (155) 197
compaction, (163) 275
composition, (161) 101
Coniacian, (156) 209
contact metamorphism, (160) 681
continental crust, (154) 247, (163) 97, (163) 109
continental drift, (154) 13, (156) 75, (160) 845
continental margin, (156) 239, (160) 845
convection, (154) 139, (155) 75, (155) 87, (156) 19, (157) 1, (157) 9, (157) 151, (157) 167, (160) 289, (160) 563, (162) 15, (163) 31, (163) 109
core, (160) 823
core–mantle boundary, (160) 343, (160) 551
cosmogenic elements, (161) 231
Costa Rica Rift, (162) 165
creep, (157) 249, (163) 197
Cretaceous, (155) 221, (160) 695, (160) 729, (163) 235
crust, (154) 1, (156) 101, (158) 121, (160) 225, (163) 167, (163) 175
crustal thinning, (154) 279
Cyclades, (157) 23
cycles, (160) 695
cyclic processes, (160) 147

D″ layer, (160) 343, (160) 551
Dabie Mountains, (161) 215
dates, (158) 67
deep-sea sedimentation, (155) 29, (160) 623
deep-water environment, (155) 15
deformation, (156) 47, (160) 1, (163) 83
degassing, (156) 125, (160) 695, (160) 709
dehydration, (163) 361
delamination, (156) 101, (161) 101
Denmark, (160) 179
density, (156) 13, (157) 79
denudation, (160) 723, (161) 57
deposits, (161) 189
deuterium, (158) 81
Devonian, (158) 175
diagenesis, (157) 233
diamonds, (159) 1, (160) 311, (160) 831, (161) 179
diffraction tomography, (159) 87, (159) 99
diffusion, (158) 81, (158) 91, (160) 273, (160) 433, (160) 505, (161) 119, (161) 189, (163) 43
dike swarms, (163) 109
dikes, (163) 221
diopside, (160) 505
dipole–dipole methods, (160) 391
discontinuities, (157) 57, (160) 551
DNA, (157) 223
dynamos, (160) 15, (160) 391

early diagenesis, (155) 205
Early Tertiary, (154) 41
Earth, (160) 15, (162) 15
earthquakes, (157) 249, (160) 97
East Greenland, (160) 845
East Pacific Ocean Islands, (161) 85
East Pacific Rise, (154) 109, (159) 183, (160) 419, (160) 593, (163) 131
eclogite, (160) 681, (160) 831, (161) 33
Ecuador, (154) 153
